Accelerometers

1D accelerometer 1 V/g

Single component accelerometer sensor for structural and environmental seismic monitoring, accuracy of 1 V/g, housed in an aluminum IP-67 protection rate case with embedded fixing flaps; ideal for installation in hard environments, it is supplied with IP-67 12 male Amphenol connector with protective cap and orange polish PUR cable. Aluminum mounting bracket is supplied together with sensor, in order to allow installation both on horizontal and vertical surfaces.

- TECHNICAL SPECIFICATIONS -

- Accelerometer sensors 1 V/g
- Aluminum IP67 case with fixing flaps
- Mounting bracket for vertical surfaces
- IP67 connector
- Cable length: 3 mt
